

# Better Bolting Celebrates Its 20th Anniversary

Grandville, MI, Release: February 22, 2022. *For Immediate Release*

Better Bolting announced its 20th anniversary as a Michigan-based solution for bolting and lifting products.

Better Bolting began in the back room of a garage in 2002. In 2011, Mike Perry Founder and President, has grown the company into a full-service rental, sales and repair service for hydraulic torque wrenches and lifting cylinder and pumps. The company also offers calibration service related to the bolting industry.

Since its inception in 2002, the company has been providing bolting and lifting solutions for companies in the wind energy, gas, electric, nuclear, plastics and military & defense industries. Now in its twentieth year providing heavy bolting solutions, Better Bolting has become the Michigan leader by expanding our staff, product offerings, inventory, services, and facilities to meet our customers ever changing needs.

"Better Bolting has experienced exceptional growth and innovation over the past years," said, Mike Perry Founder and President. "Moving forward, our focus will remain on offering local expertise and a local rental fleet to bring our customers the best options to work safely and efficiently."

Over the past twenty years, Better Bolting has been successful at evolving and changing to stay ahead in the bolting industry by bringing consistency, reliability, and innovation to the torquing product industry. Mike continues, "We have also expanded our product offering in areas aligned with our core business to continue to be a resource and partner to the people and companies who have helped us get where we are today."

Currently Better Bolting is undergoing accreditation for ISO 17025 Calibration Lab Services.
